FOUNDATION

Fast and Carefully was founded in September of 2006 by a student of the faculty of Economics of Oxford. Unlike his friends he didn't have rich parents. That's why during his free time he was thinking of how to earn money.

The company was founded in September of 2006 by Vance Havne, an economics student at Oxford. A man of humble means, Havne, developed Fast and carefully to fund his education.

He noticed that most of his friends, buying expensive clothes or equipment, considerably overpaid for them. From the other hand, these were people who didn't want to walk through the shops, comparing prices and choosing the most profitable offers...

The idea was developed after he noticed his wealthier peers enjoyed designer clothing, the latest electronics, etc. versus others who were on a budget and could not afford luxury items. Whether, as full-time students, they no longer had the time to travel and shop or they just didn't have the means, he saw a need for high-end merchandise available for one-stop shopping online and at a discount.
